

OUR STORY

With over 15 years experience in garment production, **T-SHIRT Bangkok** has established itself as the leading manufacturer of high-quality custom apparel in Bangkok, Thailand. Our goal is to offer our domestic and international client base a complete production solution, supporting you from initial artwork / design preparation, fabric selection/ detailing, through to sample approval and finally, your completed production order.

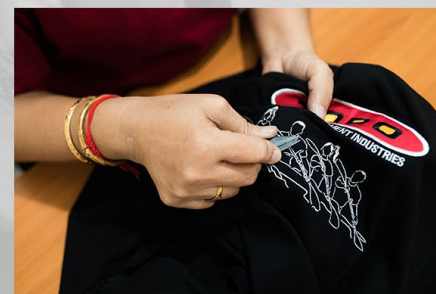

Our dedicated staff members are ready to support all production requests; whilst being able to share their wealth of knowledge to best help you achieve your production needs. We are able to assist within all aspects of creating your custom garment order, supporting you with advice and 'best practice', depending on your desired design needs and product functionality.

Our factory has the capacity to manage orders of all sizes, offering a smooth/ transparent production process, with quality control and deadline achievement being of highest priority. We have extensive experience manufacturing many garment styles for the global market, aiming to achieve prompt production completion at competitive prices.

Our international team of production specialists are able to communicate fluently in several languages, serving to make your production experience as clear and smooth as possible. We continue to develop long-term relationships with our clients, and take great pride in our ability to repeatedly achieve their custom garment production needs.

T-SHIRT BANGKOK HIGHLIGHTS

PRINTING

T-Shirt Bangkok has established itself as the premium garment printing service in Thailand. We offer a comprehensive variety of printing techniques to match all custom garment production requests, and have highlighted some of our printing services below:

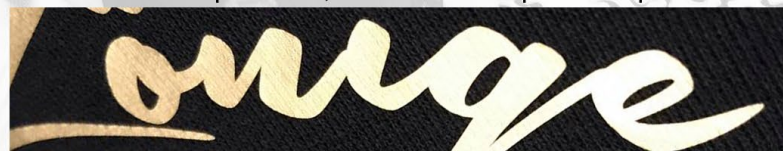

Screen-printing: T-Shirt Bangkok pride ourselves on this artisan printing technique. Our team of hand-screen printers have a wealth of knowledge and experience in this traditional technique, from block set up to garment printing, which we feel sets us apart from other garment printing services.

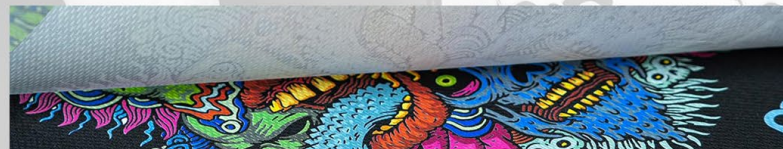

Sublimation: Involving the transfer of your design from sublimation paper onto your garment fabric via heat and pressure. The process results in the ink being absorbed by the fabric's fibres, giving a smooth garment finish with no detectable print feel.

Flex: Highly durable print technique most commonly used for sportswear, but also offers as a solution for those seeking low minimum order quantities, due to no set up fees required.

DTF: Direct-to-film printing (DTF) allows us to directly print artwork designs onto all fabric types, including darker fabrics (which techniques such as sublimation and DTG do not allow for).

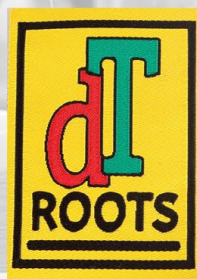

DTG: Direct-to-garment printing (DTG) is ideal for clients looking to use designs with multiple colours or photographic imagery, seeking a lighter print feel for their final product, with no artwork block set up fees required.

EMBROIDERY/ PATCHWORK

Offering additional tactile decorative options through embroidery or custom patch application can further help build your custom garment. With a wide-range of techniques at our disposal, we are able to advise on the best application of your design to your custom garment, using multiple decorative techniques.

LABELS

We understand the importance of the finer details when it comes to the finishing of our client's custom production order, and the significance of the application of custom labelling. We provide a labelling design and production service, allowing clients to insert custom woven/ satin/ paper/ care labels into their product design to further separate our client's product from others.

HANG-TAGS

Hang-tags are an effective way to add a professional finish and feel to your product, helping to elevate your brand. Our design team are available to assist in the creation of your custom hang-tag, offering advise on paper weight/ finish, design application, and any other support needed to achieve your desired final hang-tag.

T-SHIRTS

We offer clients the ability to customise all aspects of their t-shirt order: from fabric composition and weight; t-shirt size specifications, dimensions and size scaling; to the printing / decorative techniques used (all serving to provide a unique T-shirt production service). We also have a wide variety of stock t-shirt patterns in a range of compositions, for those clients looking for a simpler production process, working with our high-quality product range and dedicated team of specialists available to assist throughout your production process.
